---

### PROFESSIONAL SUMMARY

Experienced Full Stack Developer and UX/UI Designer with over 4 years specializing in web and app development. Proven track record in CI/CD, delivering large-scale solutions. Significant achievements include single-handedly re-developing the home page of [rednodo.com](http://rednodo.com) and increasing performance by 46% in 1 month, and leading a web development team in website creation and management for several high-standard hotels like [azulhotelretreat.com](http://azulhotelretreat.com) and [nomadlivingcr.com](http://nomadlivingcr.com). I'm a very fast learner and can adapt with ease to new situations. My previous coworkers could say I'm good to work in a cross-functional team. I like big challenges and love problem-solving with both software and hardware.

---

### RELEVANT EXPERIENCE

#### Head Systems Engineer and Project Manager - ClickAss Hotel & Tourism Marketing

2024 - Present

- Reduced processing time and improved website performance (+35% avg.) and SEO (+45% avg.) for 20+ hotels which led to better engagement and +4 avg. minutes spent by customers, increasing bookings by up to 60%.
- Integrated AI systems and trained AI chat-bots to improve customer's experience for multiple hotel websites, which also elevated ratings by 0.7.
- Integrated APIs regarding E-commerce transactions, currency, maps, external reservation widgets, etc. to make booking as easy and comfortable as possible and therefore increasing revenue.
- Led a team into designing strategies to extend our network through ads and SEM and had a prominent role in decision-making.
- Detected and solved more than 200 critical software bugs while providing technical support.
- Wrote clean, maintainable, scalable, and tested complex code for 5+ applications following Agile product development methodologies.

#### Semi Senior Developer - Rednodo Digital Marketing

2022 - 2024

- Developed and coded all the emails and form web pages for several webinar events for **Current Lighting**, along with automated email distribution lists to potential customers through HubSpot which led to 15% increased sales.
- Identified an error in the HubSpot forms creator which had a negative impact in thousands of users globally and suggested the solution which led to them finally correcting it and saving time for my organization (in addition to other thousands).
- Integrated data automation systems saving up to 4k a year and also team's time, reducing boring tasks.
- Trained my own boss into HTML improving team understanding of the daily problematics.
- Improved functionality, re-styled, made responsive adjustments, fixed errors and did unit testing boosting code quality for multiple websites in both mobile and desktop.

#### IT Manager - Sacca Real Estate

2021 - 2022

- Boosted security with high quality systems and eliminated vulnerabilities, gaining more trust from stakeholders.
  - Collaborated with stakeholders in translating business requirements into actionable software solutions, enhancing project success rates.
  - Mentored junior developers, fostering a culture of continuous learning and improvement within the team.
- 

### EDUCATION
